

# Z-MEDICA® HEMORRHAGE CONTROL TRAINING KIT

The Z-Medica Hemorrhage Control Training Kit (HCT) is the ideal hands-on training tool to accompany our web-based training programs.

Following successful completion of our online certificate program, it is recommended that all end users perform a practical demonstration of their skills under the direction of a qualified instructor. The Z-Medica Hemorrhage Control Training Kit presents multiple wound patterns, offering a realistic and practical training experience. The kit comes with moulage training gauze and QuikClot® hemostatic dressings.

## QuikClot Hemorrhage Control Training

Z-Medica has developed online hemorrhage control training programs to introduce users to the correct use of QuikClot products. A printable certificate is available upon completion.

**Train online, anytime, at no cost at [Z-Medica.com/training](http://Z-Medica.com/training)**

# Z-MEDICA® HEMORRHAGE CONTROL TRAINING KIT WITH BIOFEEDBACK

The Z-Medica Hemorrhage Control Training Kit with Biofeedback (HCTB) provides users with advanced and effective quantitative pressure monitoring training.

The HCTB provides immediate results for both trainer and student, quickly verifying correct or incorrect compression technique. This kit is wireless and completely mobile, making it convenient for frequent use in a variety of locations. All of the training sessions are stored digitally.

## Biofeedback Value

To effectively stop and control bleeding, a trainee must continually maintain compression force during application. The HCTB builds the confidence and potential muscle memory necessary for correct technique in the field.
