

Federal Relief Funding Available For First Responders

Recently there has been an increase in requests for QuikClot® products as First Responders prepare for delays at hospitals along with heightened crime and possible civil unrest. To help with this impact the US government approved a disaster declaration for your state to help with the COVID-19 crisis, which opens up funding from FEMA to support your efforts on the front line.

The information below is a guide to FEMA funding and QuikClot® hemostatic products.

QUIKCLOT® PRODUCT INFORMATION

QuikClot® EMS 4x4 Dressing / Item #636

Smaller Surface Bleedings (Nuisance)

QuikClot® EMS 4x4 Dressing is a sterile, nonwoven, white hydrophilic gauze impregnated with kaolin, an inorganic mineral that accelerates the body's natural clotting ability. It may be used for temporary management of bleeding wounds such as cuts, lacerations, abrasions, and traumatic injuries.

QuikClot® EMS Rolled Gauze / Item #475

Deeper and or Large Surface Bleedings

QuikClot® EMS Rolled Gauze is a sterile, nonwoven, white hydrophilic gauze impregnated with kaolin, an inorganic mineral that accelerates the body's natural clotting ability. It may be used for temporary external use to control traumatic bleeding.

QuikClot Combat Gauze® LE / Item #350

Massive Hemorrhage Penetrating Wound Bleedings

QuikClot Combat Gauze® LE, is a sterile, nonwoven, white hydrophilic gauze impregnated with kaolin, an inorganic mineral that accelerates the body's natural clotting ability. The gauze is packaged in an easy-tear pouch, contains an X-ray detectable strip for easy identification and has five year expiration.
